IT'S SOFTWARE DEVELOPMENT MADNESS

August 17 – 19, 2022

Keynote – Christina Aldan

.NET Rocks! 20th Anniversary Party

A Toast to Women in Technology

How did I get started with NoSQL databases?

What are Relational Databases

Relational Model

- First-order predicate logic
- Described by Edgar Codd in 1969
- Data represented in terms of tuples
- Purpose is to provide declarative method for specifying data and queries

Codd's 12 Rules

0: Foundation Rule

1: Information Rule

2: Guaranteed Access

3: Systematic treatment of
NULL values

4: Active Online Catalog

5: Comprehensive data
sublanguage

6: View Updating

7: Possible for high-level
insert, update, and delete

8: Physical data
independence

9: Logic data independence

10: Integrity Independence

11: Distribution
Independence

12: Nonsubversion Rule

Typical Relational Model

Big Names in Relational Databases

ORACLE®

PostgreSQL

What are NoSQL Databases

What are NoSQL Databases

Modeled in means other than tabular relations

Existed since late 1960s

Increasingly used in big data and real-time web applications

NoSQL Motivations

Simplicity of Design

Simpler Horizontal
Scaling

Finer Control over
Availability

Limiting Object-
Relational Impedance

Availability over Consistency

Relational
ACID Transactions

NoSQL
Eventual Consistency

Eventual Consistency

What's in a Name

NOSQL

Many types of NoSQL databases

Couchbase

Document

elastic

Typical Relational Model

Same but in a document database

```
{  
  "id": "1",  
  "firstName": "Thomas",  
  "lastName": "Andersen",  
  "addresses": [  
    {  
      "city": "Seattle",  
      "state": "WA",  
      "type": {  
        "name": "Primary"  
      }  
    }  
  ],  
  "contactDetails": [  
    {  
      "detail": "First Detail",  
      "type": {  
        "name": "A detail type"  
      }  
    }  
  ]  
}
```

Data Model Comparison

Data Model	Performance	Scalability	Flexibility	Complexity	Functionality
Key-Value Store	High	High	High	None	Variable (None)
Column Store	High	High	Moderate	Low	Minimal
Document Store	High	Variable (High)	High	Low	Variable (Low)
Graph	Variable	Variable	High	High	Graph Theory
Relational	Variable	Variable	Low	Moderate	Relational Algebra

Ben Scofield – NoSQL presentation at CodeMash 2010

Things to think about

Skillset

Time to Market

Known Data Structure

Scalability

Don't forget

Hybrid

Example Explainer

Based on Real-World Project

Product & Pricing Management (PPM)

Vacation Rental Listing

- Allow property owners to list their vacation rentals
- Allow vacationers the ability to search for vacation rentals
- Provide vacationers with details of the properties
- Allow for configurable property/room attributes
- Localized versions of all the information
